

PROCEDURE FOR INSTALLING GENERATOR SET ON ROOF TOP (RES)

NOTICE

All the members are informed that in Residential Building a generator set may be installed as per following:

1. Generator set to be installed in basement or front lawn 5 ft. away from boundary walls within the premises.
2. Generator set must be installed with sound proof canopy and noise beyond the boundary limit shall not be more than 15 decibels.
3. Maximum capacity of generator set is 25 KVA.
4. Generator set will not be used as prime supply but only in failure of WAPDA / MEPCO power supply.

Note: This supersedes all previous rulings / notices on this subject.
